

# Occupational safety policy

The occupational safety policy is defined by principles of occupational safety.

## Our vision:

The health of our employees has top priority.

It is our obligation to promote occupational safety.

All workplaces are designed securely, ergonomically and healthy.

## Our guidelines:

- **Continuous improvement**

We preserve the health and capability of our employees by continuous improvement. Trainings and briefings help to achieve the necessary standard of knowledge and the awareness of occupational safety.

- **Occupational safety is a management task**

Managers set an example in the company. They carry out hazard assessments, create necessary instructions and ensure its compliance.

- **Occupational safety and health protection are integral parts of all operations. They are already included during the planning phase.**

- **Safe production**

Production facilities are planned and used in such a way, that the employees are not exposed to any threat.

- **Secure operating materials**

Operating materials get tested before application.
